
MedExpert

An innovative app by: David Chen, Chloe Morrison, Sanop Shaji, and Jason Yau

MedExpert

We developed Med Expert, a Salesforce app that helps prescribing doctors instantly check medication inventory at pharmacies before sending prescriptions, saving patients time and improving care.

The Problem at Hand:

- Doctors often send prescriptions to pharmacies without knowing inventory status.
- Patients waste time transferring prescriptions or calling multiple pharmacies.
- This leads to frustration, delays in treatment, and inefficiency in healthcare delivery.

Our Solution: MedExpert

The pharmaceutical version of “try before you buy”

What it does:

- Centralizes pharmacy inventory data in Salesforce.
- Allows doctors to check stock in real-time.
- Tracks medication dosages, expiration dates, and suppliers.

Inventories Chart

Medication Name ↑	Pharmacy Name	Inventory: Inventory
Aderall	Wegmans	9
Aderall	Rite Aid	9
Advil	Montefiore	5
Advil	Safeway	4
Aspirin	Rite Aid	7
Aspirin	Walmart	5
Farxiga	Montefiore	3

Where doctors can view specific pharmacies and their inventory levels:

Easy to locate specific medication listed in alphabetic order.

The Value our App Holds:

For Doctors:

- ◆ Reduces time spent finding in-stock medications.
- ◆ Improves prescription accuracy.

→ For Patients:

- ◆ Decreases delays in starting treatment.
- ◆ Fewer unnecessary pharmacy visits.

→ For Pharmacies:

- ◆ Streamlines prescription fulfillment.

→ For the Healthcare System:

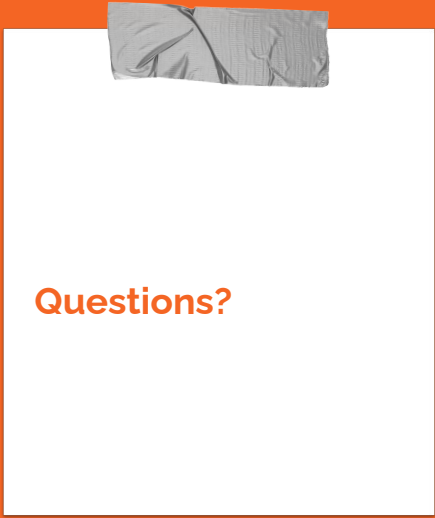

- ◆ Enhances efficiency and patient satisfaction.

Why we recommend our Salesforce app over alternatives:

- Salesforce offers real-time cloud-based data sharing, scalable architecture, and robust reporting tools.
- Provides mobile access for doctors on-the-go.
- Supports future integration with electronic health records (EHR) systems.

Med Expert solves a real problem in prescription fulfillment by giving doctors instant access to medication availability. We believe Salesforce is the best platform to deploy this app for its scalability and healthcare integration capabilities.
